¹ Moving Picture Response Time (MPRT) improves the response time and reduces motion blur in the monitor. Enabling MPRT will disable AMD FreeSync™ technology, and you may notice a negligible flicker. | ² Overclocking at 180Hz is based on laboratory test data, and this function may cause irregularities in the display. | ³ Supports 1920 x 1080 @ 165Hz as specified in HDMI 2.1. | ⁴ Formerly Lenovo Display Control Center. Supports Windows 10 & 11, Mac OS, Windows On Arm (functions vary across systems). | ⁵ AMD FreeSync™ Premium technology only can work with AMD Radeon™ series graphics card.
