

INSTRUCTIONS FOR FREE FOCUS BINOCULARS GULFSTREAM 7x50

ROLLDOWN EYECUPS

If you wear sun/eyeglasses, rolldown the eyecups (A). This will bring your eyes closer to lens thus providing improved field of view.

HOW TO ADJUST FOR DISTANCE BETWEEN YOUR EYES

The distance between the eyes, called "interpupillary distance" varies from person to person. To achieve perfect alignment of lens to eye, follow these simple steps.

- (1) Hold your binocular in the normal viewing position.
- (2) Grasp each barrel firmly. Move the barrels closer together or further apart until you see a single circular field. Always re-set your binocular to this position.

GULFSTREAM 7x50 #01-2434B-1

FOCUS SYSTEM

Unlike standard binoculars, your free focus binocular has no focusing mechanism. Your binocular is permanently in focus at all distances from a minimum focus point to infinity. Once you have adjusted for distance between your eyes, you are ready to enjoy the view.

INSTRUCTIONS FOR CARE

1. Always store your binocular in its case when not in use.
2. When wiping the lenses, use a soft, lintless cloth.
3. To remove any remaining dirt or smudges, add one or two drops of isopropyl alcohol to the cloth.
4. Store your binocular in a moisture-free area.

VERY IMPORTANT

Never attempt to clean your binocular internally or try to take it apart.

CAUTION

Viewing the sun can cause permanent eye damage. Do not view the sun with this product or even with the naked eye.
