*Les taux de rafraîchissement réels peuvent varier en fonction du modèle, des spécifications de l'ordinateur, du matériel et/ou de la configuration. Cet appareil est conçu pour prendre en charge l'overclocking de la fréquence de rafraîchissement. Cependant, l'overclocking peut entraîner une instabilité du système. En cas d'instabilité, essayez de réduire l'overclocking à un taux de rafraîchissement plus faible via les paramètres de l'affichage à l'écran.

We named our line of gaming products after a fierce hunter – the Predator. We design gear for serious gamers – members of what we call the Predator tribe. Every member of our tribe has the soul of a warrior on the path to battle. We each bear the mark of our deadly mission. Our ancestors painted their bodies with dirt and blood to strike fear into the hearts of their enemies and rally comrades to battle. We draw inspiration from these intimidating marks. The symbol of the Predator tribe represents loyalty, power and ferocity. Use it wisely. Embolden your tribe and demoralize the enemy. Lead us to victory

In a continuing effort to improve the quality of our products, information in this document is subject to change without notice. Images shown are only representations of some of the configurations available for this model. Availability may vary depending on region. As a phenomenon known to thin-film transistors (TFTs), liquid crystal displays (LCDs) commonly exhibit a small number of discoloration dots, as so-called "non-conforming pixels." This phenomenon is a limitation of TFT LCD technology, not a product defect, and as such is not covered by Acer's warranty. © 2015. All rights reserved.
