TUF-GAMING-1200G

Built For the Long Haul

ASUS Features

■ TUF Components

With military-grade components, including capacitors rated for 105°C operation and up to 170,000 hours lifespan, the ASUS TUF Gaming 1000W Gold empowers you to build in confidence.

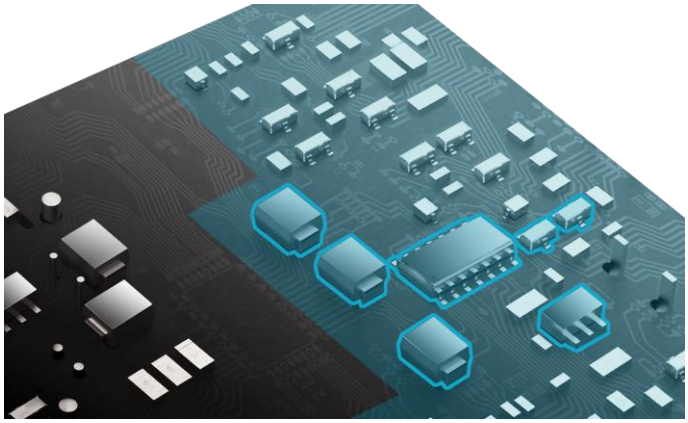

■ Dual Ball Fan Bearings

Exemplary cooling is provided by a 135mm fan spinning on a dual ball bearing setup that will last up to twice as long as a sleeve bearing design.

■ Protective PCB Coating

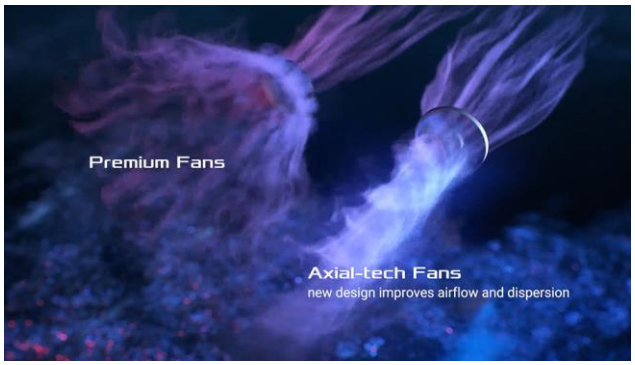

A protective conformal coating envelops the PCB to protect against moisture, dust, and debris.

TUF GAMING

■ Axial-tech Fan Design

Axial-tech fan design features a smaller fan hub that facilitates longer blades and a barrier ring that increases downward air pressure. For TUF Gaming series PSUs, we've scaled that design to 135mm so it keeps things cool at low RPMs while producing less noise

■ Fully Modular Etched Cables

The included fully-modular cable set is etched to provide a similar aesthetic to sleeved cables but a touch more flexibility for tight spaces.

■ 80 Plus Gold Certification

The TUF Gaming 1200W Gold features efficient, low-ESR Japanese capacitors to ensure efficient operation — affording it 80 PLUS® Gold status. This means it delivers up to 92% efficiency, resulting in less heat, reduced fan noise, and increased reliability.

■ 10-year Warranty

TUF Gaming Gold Series PSUs are backed with a 10-year warranty.
