

270° Panoramic View

Experience a seamless view unobstructed by a front pillar, offering an unparalleled visual display of the internal components and ensuring your build shines from every angle.

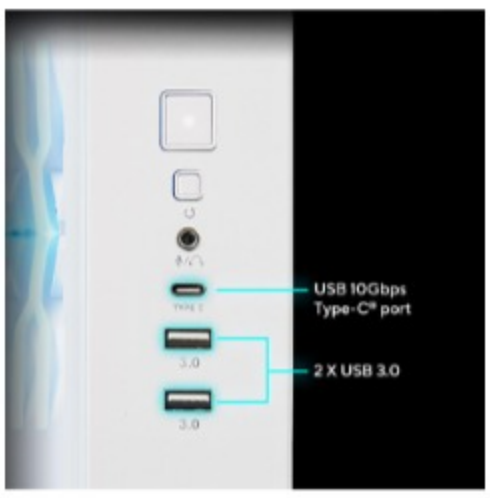

ROBUST THERMAL DESIGN Four pre-installed RGB fans

The A32 PLUS chassis is engineered for optimal cooling, with four ARGB fans pre-installed - three reverse-blade models and one standard model - and support for six more. Optimally located side panel grilles also facilitate high-volume airflow.

Broad Compatibility

A32 PLUS supports radiators up to 360mm long, graphics cards up to 420mm long, CPU air coolers up to 165mm tall, ATX power supplies up to 220mm long, and up to ten 120mm fans, giving builders plenty of options to assemble their next PC.

Front Panel USB Type-C

The A32 PLUS front I/O panel features a USB 10Gbps Type-C port for transfer speeds up to 10Gbps, in addition to two USB-A ports.

Easy Way To Detach Side Panels

The side panels use an intuitive mechanism to open effortlessly. This user-friendly design ensures quick accessibility.

Silicone Cable Grommet For Easy Cable Management And Aesthetics

High-quality silicone grommets help organize wires, enhance durability and create an aesthetically pleasing interior.

User-Friendly Storage Support

The A32 PLUS features a removable drive cage to enhance storage flexibility. The cage supports up to two 3.5-inch or three 2.5-inch drives.
