

Cool. Compact. Quiet.

COOLING X

Cooler Master Cooling X is a desktop PC like no other. Its unique liquid cooling solution has been redesigned to make Cooling X compact, cool and silent. Both the CPU and GPU are efficiently cooled through a copper water block which effectively removes heat and channels it towards a 240 mm radiator and liquid-cooled side panels. These components work seamlessly to dissipate heat, resulting in enhanced performance and durability. Cooling X stands as the ultimate tool for gamers and creators who demand nothing but the best.
