System

Shock Resistant  
(MIL-STD-810G  
METHOD 516.6)

\* Recording time may vary by country-specific version.

## Enhanced Volume with Side Volume Key

### Loud volume that is easy to hear

Dedicated volume key and a receiver volume that is about 70% louder<sup>\*1</sup> than the standard Panasonic DECT telephones (KX-TG6821).

## Automated Call Block<sup>\*2</sup>

### Effortlessly free yourself from annoying automated calls

The unit plays a greeting requiring the caller to enter an access code before the handset rings. Automated callers will not be able to enter the code and their calls will be disconnected. If the caller's information is stored in the unit, the call is connected without prompting for the access code.

## Nuisance Call Block<sup>\*2</sup> with Dedicated Button

### Reduce unwanted calls such as telemarketers

Nuisance Call Block allows you to block calls from unwanted numbers, such as telemarketers and free phone number prefixes. The current number can be easily registered to the call block list by pressing the dedicated Call Block button while the phone is ringing or during a call. The KX-TGH72 series can block as many as 1000 registered numbers. This feature helps to keep your fun times from being interrupted.

Call Block Button

## Full Duplex Speakerphone

### Do something else while talking

You can talk with your hands free which is convenient when you need to take notes or use your computer, etc. Also everyone around you can join the conversation.

## Advanced Answering System

### Catch answering machine calls whether you are at home or away

When you are near the base unit and a new message is recorded on the answering machine, it can alert you with a sound. In addition, individual messages can be fast-forwarded or rewind. When you are away, the base unit can send an alert by a call to a pre-registered mobile phone or office phone. You can answer the call to hear your new message.

### Other Features

- Shock Resistant (MIL-STD-810G METHOD 516.6)
- Eco Mode / Eco Mode Plus
