DAILY USE**

- Suunto Vertical 2 is built for the adventurers looking for a reliable & tough companion. Based on the original Vertical, it combines the reliable navigation tools, excellent training features and outdoor essentials with a new bright AMOLED display, a built-in LED flashlight as well as an improved fit and interior.
- Featuring detailed outdoor maps, dual-band GPS, 3D heatmaps and feature like Climb Guidance to better prepare for your adventure, Vertical 2 combined with Suunto app keep you on track.
- The extremely long battery-life of up to 20 days in daily use and up to 65 hours in best GPS training mode, ensures you are ready for adventures of any length.
- For the time between expeditions, the watch is designed for everyday wear. From tracking daily activities and sleep to controlling the music or using the flashlight to finding your keys in the dark, Vertical 2 is your companion.
- Vertical 2 is built to get better with time. With future software updates, new features and expanding capabilities through Suunto app, the watch continues to bring more value to you over time.
- For more insights on your training and recovery, as well as planning your adventures in advance, check out Suunto app and SuuntoPlus™ store.
