SOUND BY
harman / kardon

Trusted by more than 1.5 million users globally, XGIMI designs and manufactures high performance multi-functional smart projectors and laser TVs, and is determined to improve viewers' audio-visual experience. XGIMI has created a series of game-changing giant screen projection products with critical partners like Harman/Kardon, Google, Texas Instruments, and Baidu.

XGIMI reimagines the Home Projector space by bringing the best user experience through performance and intuitiveness. Developed to compliment every home style and interior decor, XGIMI promises absolutely set-up free eye-catching projectors.

The compact devices are incredibly powerful to create an outstanding immersive home theater experience. This has led XGIMI to win international awards such as CES Best Innovation Award, iF Design Awards, Red Dot Design Award and Good Design Award 36 times.

The background of the slide is a high-quality image of Earth from space, showing the blue and white clouds of the planet against the blackness of space. A bright light source, likely the sun, is visible on the horizon, creating a lens flare effect. The Moon is visible in the upper right quadrant of the frame.

XGIMI AURA
PRODUCT OVERVIEW

A bright light source is positioned on a thin, glowing horizon line that spans the width of the image. The light source creates a starburst effect with four rays extending outwards, and a soft, circular glow around it. The background is a solid black color.
