Cinematic

400 ISO Lumens

Brightness is essential for clear and visible projected images.

The MOGO 2 Series has advanced technology in its self-developed light engine to reduce light loss and deliver up to 400 ISO Lumens brightness.

Cinematic

90% DCI-P3

In the field of film and television even game production, the DCI-P3 standard is becoming increasingly popular.

Marvel movies, Star Wars
Netflix Tomb Raider, Honor of Kings

The MoGo 2 series projector, which supports 90% DCI-P3, can better provide better image quality, revive media contents.

Cinematic

D65 Colour Standard

D65 color standard in MoGo 2 for realistic movie color.

Using the D65 color temperature standard can reduce the color cast of the characters and scenery.

D65 color standard enables MoGo 2 Series better deliver color philosophy and emotional atmosphere .

MoGo 2 Pro Other portable projector

Cinematic

2*8W Stereo Speakers

MOGO 2 has upgraded speaker specifications, with two 8W speaker units providing powerful stereo sound output that even challenges higher-priced models.

The MOGO 2's double-sided speakers provide wider and more even sound field, reducing high-frequency loss and providing more Immersive and dynamic audio experiences.

Cinematic

Visible Bass Diaphragm

MOGO 2 features a transparent diaphragm window at the back of the device, allowing users to observe the diaphragm structure and better appreciate its high-quality audio performance, while also providing visual appeal.

Cinematic

4 Professional Audio Modes

With such powerful speakers, we had to provide you 4 incredible modes. Choose freely from our Movie, Sports, Music, and News modes tuned professionally to suit your audio needs and your different use requirements, all with one machine.

Smart - ISA 2.0

Uninterrupted Auto Focus
Uninterrupted Auto Keystone

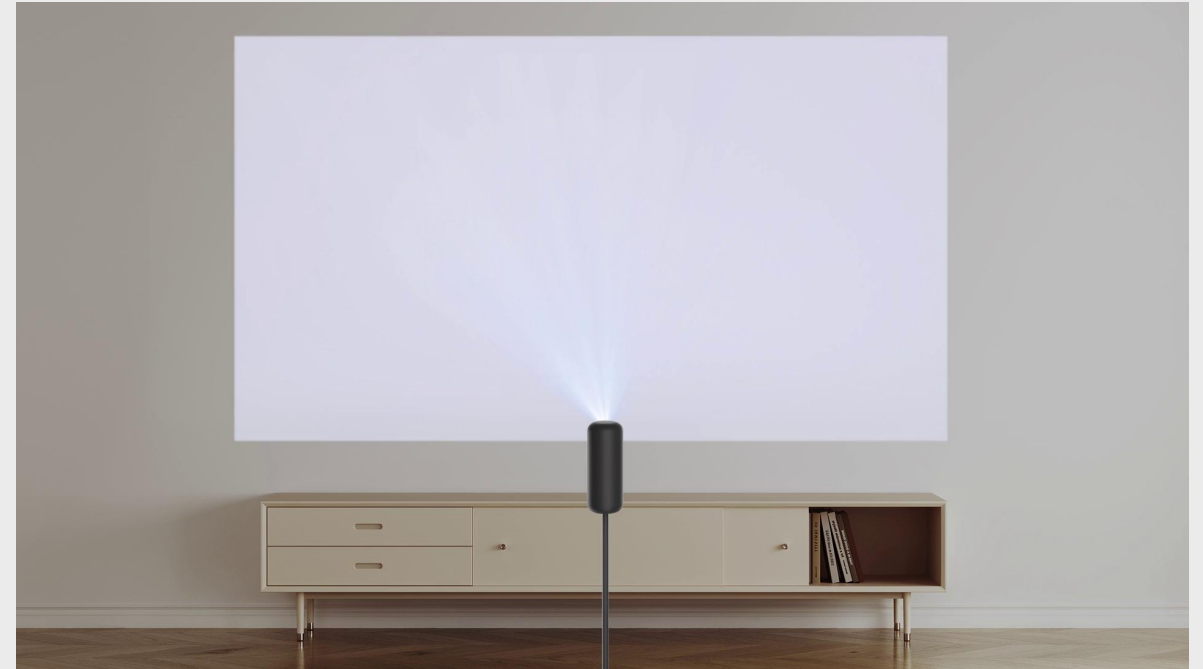

ISA 2.0 enables automatic keystone correction and autofocus without the user noticing, creating a smoother and more immersive viewing experience.

The technology achieves multi-angle automatic focus and keystone correction after the user adjusts the projector's position.

It can correct keystone distortion for both horizontal and vertical side projection, ensuring the clearest and most suitable viewing experience for users.

Smart - ISA 2.0

Eye Protection

Intelligent eye protection is also an important upgrade of ISA 2.0.

For home users with children and pets, when a child or pet passes in front of the camera or stays there, the image will automatically darken to prevent glare from entering their eyes.
