

## Always clean floors with fresh water

Balanced-pressure water flow system

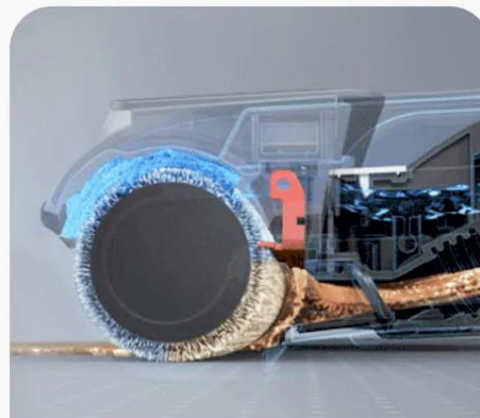

### Rinse with fresh water

With fresh water evenly dispersed, the brush roller stays clean while washing the floors.

### High-speed washing

The brush roller continuously washes with 450 revolutions per minute.

### Constantly wrings dirty water

The unique floating scraper "squeezes" the dirty roller with each revolution, getting rid of dirty water.

### Immediate suction of dirt

With a flat tube design, the dirty water is quickly sucked back up into the dirty water tank.

## Bi-directional self-propulsion

### SmoothPower self-propulsion system

Pushing forward or pulling back, S7 Pro assists the movement and makes cleaning easier than ever.
