

PHILIPS

NeoPix 244

NPX244/INT

INCLUDED

USB-C=>HDMI™

A stylish projector adapted to you

Imagine taking your viewing experiences to unprecedented heights, no matter where you are. Meet the Philips NeoPix 244, a compact projector designed to redefine how you see the world and project on any flat surface thanks to its 180 degrees rotating stand. The NeoPix 244 provides dynamic, native Full HD 1080p visuals up to a staggering 80".

Its HDMI port lets you connect your gaming console or any other device like a laptop, smartphone or a Blu-ray player. Just connect your USB stick or hard drive to play movies, images, and even music with the built-in multimedia player. The stereo speakers will ensure you have sound wherever you are, and with the 3.5mm audio jack you can plug in your external speakers for bigger sound. The NeoPix 244 also includes a USB-C to HDMI cable, so that you can connect your smartphone and watch your favourite video streaming apps on the projector.

Moreover, the inclusion of a built-in LED strip transforms the device into a convenient bedside lamp, providing ambient lighting even when the projector is not in use.
