DESCRIPTION:

DASH PAD PRO is a universal smartphone holder for cars made of flexible silicone with a glue-free non-slip base and suction cups, guaranteeing perfect adherence to all types of dashboards and curved surfaces.

The completely flexible structure and its special shape allow the smartphone to be positioned and removed with a simple gesture, while the perfectly grip material guarantees maximum stability and safety at all times when driving.

Easy to install, the Dash Pad Pro integrates perfectly with the dashboard design and allows the smartphone to always be at hand, guaranteeing the best visibility of the display during car journeys.
