

HUG AIR PRO

Electronic car smartphone holder with wireless charging up to 15W

HUG AIR is the electronic in-car smartphone holder with Qi wireless charging. With its single-coil electronics, Wideactive™ 1 technology ensures an efficient, continuous wireless charge without overheating your smartphone.

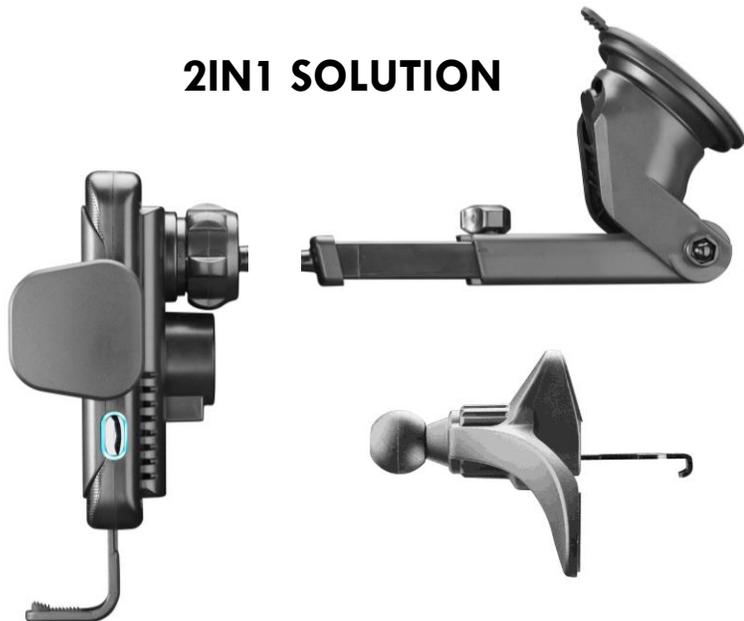

The peculiarity of the product, however, consists in the presence of integrated sensors that allow the automatic opening and closing of the holder and that facilitate the insertion and removal of the phone.

The package includes two different car mounting systems: suction cup for the dashboard and hook for the air vents. This guarantees maximum versatility of use and adaptability to different car interiors.

With the super grip suction cup, you can easily mount the holder either on the glass or on the dashboard. With the innovative hook, the holder can instead be mounted on the car air vents, both standard and round ones.

2IN1 SOLUTION
