

SLIDE FIT

In-car holder with easy insertion system

SLIDE FIT is the in-car smartphone holder featuring easy insertion and disinsertion systems: the holder opens and closes automatically with the weight of the smartphone.

Extremely practical and agile, SLIDE FIT is also very solid and secure as it holds the smartphone on the three sides.

Thanks to the innovative hook attachment, SLIDE FIT can be mounted on all types of air vents, both standard and round.

Featuring a retractable spring, SLIDE FIT is also extremely compact when not in use.
