USP: take selfies with the smartphone with a practical Bluetooth shutter button

DESCRIPTION:

PICS MAG is a Bluetooth magnetic holder for taking selfies from your smartphone by pressing the shutter button or using the Bluetooth remote control.

As it attaches magnetically to the iPhone, PICS MAG is designed to be compatible with the MagSafe ecosystem. However, it's also compatible with Android smartphones thanks to the metal ring included in the package.

PICS MAG allows the smartphone to be rotated up to 180° to take photos in portrait or landscape mode.
