MAG HUB

Wireless charging station with 4 USB ports

Technical features:

- Designed for iPhone with MagSafe technology;
- Optimised wireless charging for iPhone with 7.5W output;
- Wireless pad rotatable up to 180°.
- Pad equipped with magnets for easy docking
- Two USB-A 22.5W ports
- Two USB-C 65W ports

Compatibility:

iPhones equipped with MagSafe technology (iPhone 12 and later) and all devices trough cable

DESCRIPTION:

MAG HUB 4 PORTS & WIRELESS CHARGER STATION is the charging dock with 4 ports and magnetic wireless pad, specially designed for iPhone models equipped with MagSafe technology and for all devices trough cable up to 65W.

The MagSafe technology, thanks to the magnets integrated in the charging cradle, enables automatic and precise alignment between the iPhone and the wireless charging pad. The wireless charging base can rotate up to 180° to allow optimal viewing of the device at any angle.

It provides fast 7.5W wireless charging optimised for iPhone. Two USB-A ports charge up to 22.5 and the two USB-C ports charge up to 65W.

LCD Display shows charging speed and port in use.
