

DESCRIPTION:

SELFIE STICK MAX is the new Bluetooth® selfie stick with a quadrapod function, designed to ensure stability and freedom of movement. Its solid structural support prevents wobbling, while the 360° rotation and balanced handle provide smooth panoramic shots, perfect for selfies and videos from any angle.

Versatile and practical, it can be used as a traditional selfie stick by folding the base, or as a stable support for more professional shots. The removable smartphone mount also works as a separate phone holder, and the detachable Bluetooth® remote allows you to take pictures from up to 10 meters away.

Thanks to the stainless steel telescopic rod, extendable up to 180 cm, Selfie Stick Max adapts to every need, maintaining excellent stability at all times.
