CLEANING BRUSH

<sup>1</sup> removing even shortest hairs (0.5 mm) <sup>2</sup> when used within 24 hrs after charging

## Features in detail

### Wide pivoting head

Follows your body contours for an efficient epilation. Use the wide pivoting head for up to 1 month of smooth skin, even in curvy areas.

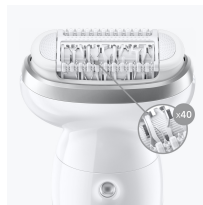

### Smart Light

The Smart Light illuminates the skin and reveals even the finest hairs you would normally miss.

### Gentle & power mode

Always the right setting for each body part. Gentle mode for sensitive areas, power mode for best efficiency.

### 40 MicroGrip tweezers

Removes hairs that wax cannot catch. The MicroGrip tweezers capture hair as short as 0.5 mm.

### Smart Touch

Designed for sensitive areas. Automatically switches between power & gentle mode, depending on the pressure applied to the skin.

### Wet & Dry

100% waterproof. Gently epilate in the bath or under the shower. The precision handle provides for a controlled grip even when used wet.

## Accessories in detail

### Massage pad

By stimulating blood circulation, the massage pad vitalizes the skin and helps to improve skin appearance.

### Shaver head and trimmer cap

The shaver head turns the epilator into a fully functional shaver, while the trimmer cap (4 mm length) lets you trim hair if you prefer. Great for removing hair even in the most sensitive areas.

### Exfoliation brush

The exfoliation brush is more effective than a manual scrub. It leads to softer and smoother skin and helps to avoid ingrown hairs.
