With a fresh new design, the F30E provides you a smart, efficient and smooth way to commute. The KickScooter offers a longer range than its predecessor, being able to take you approximately 30km with one charge. The more powerful motor, combined with a higher climbing angle and long range, make it an ideal KickScooter for those looking to travel long distances. It's easy two step folding mechanism allows you to store the F30E in a car, public transport or simply carry it in one hand. Unlike its predecessor, the F25E, the F30E comes with 10-inch tubeless pneumatic tyres that have an additional jelly layer. These tyres minimize the risk of punctures as well as absorb most of the shocks to provide a pleasant ride on various terrains. The large wheel diameter guarantees a comfortable riding experience. Its low centre of gravity further ensures a stable drive feeling. The F30E is equipped with front, side and rear E-MARK certified reflectors for increased safety. Additionally, built-in non dazzling front and rear LED lights and brake light ensure rider safety in dark conditions. The F30E can speed up to approx. 25 km/h (15.5 mph) and go a further distance with a range of up to 30 km (18.6 miles). With a motor of 300W, the F30E can easily climb up to 15% of inclination with a load of 100 kgs. The new charging port is placed on the footboard, and 6.5 hours are needed for its 367 Wh (10.2 Ah) to fully charge. Furthermore, the F30E is equipped with two brakes, front – electronic and rear disc brake to ensure safe braking distance. The F30E also possesses an integrated insurance plate holder on the rear fender. To make it more eco-friendly, the Smart Battery Management System (BMS) makes sure that no power goes to waste whilst closely monitoring the battery performance to prevent criticalities like overcharge and discharge, overheating and short-circuiting. The F30E has a sleek design and an easy-to-read LED display that shows you real-time information on driving speed, power mode and battery level. It can also be connec
