Index

- (a) A general description of the packaging and its intended use
- (b) Conceptual design, manufacturing drawings and materials of components
- (c) Descriptions and explanations necessary for the understanding of the drawings provided under point (b) and the schemes and operation of the packaging
- (d) a list of
 - (i) the harmonised standards, referred to in Article 36, applied in full or in part
 - (ii) the common specifications, referred to in Article 37, applied in full or in part
 - (iii) other relevant technical specifications used for measurement or calculation purposes
 - (iv) in the event of partly applied harmonised standards or common specifications, an indication of the parts which have been applied
 - (v) in the event of harmonised standards or common specifications not being applied, a description of the solutions adopted to meet the requirements referred to in point 1
- (e) a qualitative description of how the assessments provided for in Articles 6, 10 and 11 have been carried out
- (f) test reports.

EU PPWR Technical Document

(a) A general description of the packaging and its intended use

1. Product

- Product Name : OLED TV
- Additional information :

2. Explanation of Product

This technical documentation covers series (or derivation) model in OLED TV
Models in this product group have same packaging structure.

(d) a list of

(i) the harmonised standards, referred to in Article 36, applied in full or in part

EN 13427:2004

Packaging - Requirements for the use of European Standards in the field of packaging and packaging waste

EN 13428:2004

Packaging - Requirements specific to manufacturing and composition - Prevention by source reduction

EN IEC 62321-4:2017

Determination of certain substances in electrotechnical products -Part 4: Mercury in polymers, metals and electronics by CV-AAS, CV-AFS, ICP-OES and ICP-MS

EN IEC 62321-5:2013

Determination of certain substances in electrotechnical products -Part 5: Cadmium, lead and chromium in polymers and electronics and cadmium and lead in metals by AAS, AFS, ICP-OES and ICP-MS

EN IEC 62321-7-2:2017

Determination of certain substances in electrotechnical products -Part 7-2: Hexavalent chromium

- (ii) the common specifications, referred to in Article 37, applied in full or in part

Article 5. Requirements for substances in packaging

LG Electronics manages hazardous substance information for all parts and products as specifications, and operates an internal system consisting of a 5-step verification process—from supplier selection to part shipment—to prevent the use of regulated hazardous substances.

As part of this system, LG Electronics requires suppliers to register material information for the relevant parts (information on the content/concentration of specific substances) into its hazardous substance database, HSMS (Hazardous Substances Management System), and to submit test reports to verify this data.
