

Product Fiche

Energy consumption XYZ kWh per year, based on the power consumption of the television operating 4 hours per day for 365 days. The actual energy consumption will depend on how the television is used.

Table with 9 columns: Supplier's Name, Model Name, Energy Efficiency Class, Screen size (diagonal) centimetres/inches, On-mode power consumption (W), Annual energy consumption (kWh), Standby power consumption (W), Off mode power consumption (W), Screen resolution. Rows list various LG OLED models with their specifications.

Large table with 10 columns and multiple rows, providing the same data as the previous table but in various languages. Columns correspond to the Product Fiche fields, translated for international markets.

[English]

The On mode power consumption is measured in accordance with IEC 62087. Actual power consumption may vary depending on factors such as the type of video content being played and TV settings. Standby power consumption: applies to factory default condition only when the Network standby function is deactivated.
