

Acryl it

Turntable platter

- Suitable for Debut and 1Xpression turntables
- Substitutes metal platter
- Inert material avoids resonances
- Dent for label implemented
- Ideal for use with Clamp it
- Audiophile sound tuning
- Optical upvaluation

MATERIAL acrylic with satined surface

DIAMETER 300mm

HEIGHT 20 mm

WEIGHT 1,3 kg net

SRP
109,00 €

Functional and easy to use sound improvement!

Upgrade your Debut or 1Xpression turntable to „Esprit“-standards. Acryl it is made from acrylic with satinised surface and brings a more liquid sound that leaves no space for platter resonances.

The change is easily made: just exchange your metal platter for Acryl it. Unlike metal platters, where you will need to place a felt mat between record and platter to damp metal resonance, you can put your record directly on the acrylic surface, with nothing in-between. Acryl it is able to improve overall performance significantly!
